Testimonial – NEU Verification Program

Our experience with the NEU Verification Program has been excellent. Dr. Mahmut Ekenel and the NEU team were professional, knowledgeable, thorough, and responsive throughout the entire process.

For innovative products and technologies, independent third-party verification is extremely valuable. NEU, as an ACI Center of Excellence, provides an independent technical review that helps give engineers, owners, and other stakeholders greater confidence in the technical information and claims being presented.

The verification report has become a valuable technical resource for MST Rebar. We have already used it on numerous occasions in technical discussions and presentations with major organizations evaluating GFRP reinforcement and sustainable construction solutions.

We could not be happier with the support provided by Dr. Ekenel and the NEU team, or with the value the verification has provided to us. We would highly recommend the NEU Verification Program to other companies bringing innovative technologies to the concrete industry.

Sincerely,

Alireza Asadian, (he/him), PhD, P.Eng

Technical Director
